

Enterprise day

During the autumn term, Year 6 studied in science a unit called 'Our Bodies.' The unit consisted of learning about healthy eating, the function of the heart and the importance of exercise. By the end of the unit children worked in groups to design and plan their own healthy eating enterprise day. They planned all the activities independently, decided what they were going to bring in from home to contribute to raising money and volunteered to look after the stalls that suited their skills.

On 3rd November they sold decorated cupcakes with fruits, measured teacher and pupil pulse rates, held a healthy eating poster competition, designed a game whereby they had to blindfold children who had to guess what fruit they were tasting and they even held a 'beat the banana race'. The class worked together extremely well, they showed exceptional co-operation and business skills. On the day they handled money, persuaded customers to make purchases and took ownership of their own learning. This was evident through their passion and enthusiasm to make children aware about healthy eating and raise money. Year 6 would like to say a JazakAllah to all the parents and teachers who supported us on this day.

Our next project is 'light and sight' where we will be designing and making our own reflective clothing and packaging to help children stay safe on the road Insha'Allah.
